

"To achieve high quality telecommunications services at OECD benchmark prices for Australian businesses."

ATUG 2009 National Broadband Network Reference Model Forum

Melbourne

Thursday November 12, 2pm to 4pm

Maddocks, Level 6, 140 William St

The Communications Alliance set up its NBN Project to assist the communications industry address requirements arising from the Government's policy on the National Broadband Network (NBN).

The initial work and focus is on developing an NBN Reference Model that seeks to identify the roles and responsibilities of NBN Co and service providers in the NBN framework as well as identifying key principles related to end users, services and interconnection of networks. The NBN Reference Model provides the framework which informs and contributes to the other projects areas which cover specific aspects of the NBN.
